RED JACKET

LILAC 'N' ROSE

FUCHSIAS

Visit our gardens in Ross, seventeen miles north of San Francisco across the Golden Gate Bridge. We have specimen plants of all the fuchsias listed in this catalog, growing and named, in our gardens for display and bloom. Also shown are the various ways in which they can be grown, such as fuchsia standards, hanging baskets, etc. Potted plants range in price from 60 cents in 4 inch pots up to \$10.00, according to size of plant.

Read carefully before ordering. Write plainly. Print your name and address clearly. Remit order by check or money order. Currency or coins are acceptable but we cannot be responsible for loss.

RETAIL PRICES

All our new 1958 introductions in $2\frac{1}{4}$ - $\frac{1}{2}$ pots \$.75 each.

As we specialize in the newer varieties, all 1958 introductions by other hybridizers may be ordered by mail or obtained at nursery.

All other varieties in $2\frac{1}{4}$ - $\frac{1}{2}$ inch pots \$.50, except patented and trademark registered varieties which are \$.75. We find a well rooted plant this size stands shipping best with less shock.

Special offer of 12 plants, in $2\frac{1}{4}$ - $\frac{1}{2}$ inch pots, all named varieties, our selection, \$5.00. List varieties you already have and we will not duplicate.

At times we may be temporarily out of certain varieties, so when ordering please name one or more substitute plants for second choice.

We guarantee all plants to be in perfect condition when shipped. Unless otherwise ordered, all plants are sent express collect. If you wish to have your order sent by parcel post, please be sure to so indicate and to include \$.75 to cover mailing charges. Packing free.

Minimum shipment \$3.00. On all orders for delivery within California, please add the 4 percent California Sales Tax.

PLEASE REMEMBER WE ARE CLOSED ON THURSDAYS.

We are members of AMERICAN FUCHSIA SOCIETY and CALIFORNIA ASSOCIATION OF NURSERYMEN.

NOTE — We are a "Pinto Tag" nursery;
this assures prompt delivery.

1958 Introductions

by

Muriel Waltz

1

We are again introducing four new varieties all picked for color, form and quality.

LILAC 'N' ROSE. A double and a natural trailer in a new shade of rosy pink, has medium long tube, and long pointed sepals of white flushed pink. Corolla with folded petals of Lilac changes to a beautiful shade of bright clear rosy pink. Good foliage with medium sized leaves, self branching, free blooming combined with the beauty of form and coloring in both buds and blooms, should be popular.

MARIETTA. A large double red upright of extra good substance. There are so few good upright reds we think this one will be tops. Medium long tube, buds, and broad upturned sepals are bright carmine, corolla a dark magenta red has a few splashes of carmine on outer petals, as flower matures it turns a dark clear red. Good foliage, similar to Uncle Jules (which is a parent) and strong upright growth will make this a welcome addition to the reds.

PINWHEEL. A large flat double upright in the pastel shades. Flower resembles a pinwheel in form. The short tube and buds are flushed pink. The pink sepals are broad, pointed, and turn back slightly at tips, but do not lose their flat appearance. Corolla a lovely shade of violet has folded petals which open wide in center, medium sized plant self branching with a good foliage. Ideal corsage blooms.

RED JACKET. A gorgeous large fluffy double with the whitest corolla and the brightest red sepals and buds we have ever seen. The medium sized tube, long buds, even the extra long pistil and stamens are the same rich shade of red. The white corolla which does not turn brown with age appears to get whiter and larger as flower matures. We have had blooms last over two weeks. Sepals are long and upturned. A natural trailer is an eye stopper in a basket. Can be grown in garden by staking and will make a good standard or espalier.

DOUBLE FUCHSIAS

BALL OF FIRE (Reedstrom, 1957) — Double bright red with orange red over tones and sepals of bright red. A very striking fuchsia and we believe a really new color in fuchsias. Will trail.

BERKELEY. The flowers are basically brilliant Tyrian Rose but there is considerable seasonal variation in their coloring with marbling and edgings of variety intensity in the cooler season. The tube and sepals are paler than the petalage setting it off to advantage. Easy to grow, free, vigorous and showy in flower.

BERNADETTE. A fine upright plant whose lateral branches are held horizontally. Sepals are pale rose, double corolla in Veroncia "Blue." Medium sized flowers in the popular blue tone.

BLUE & GOLD. Plant with lemon yellow medium sized leaves. The blooms are large double, mauve blue. The sepals are palest pink. Blue & Gold is a vigorous growing plant. It will bloom heavily over a long season. It is a new addition to the "foliage" Fuchsias.

BLUE WAVES (Waltz) Double corolla with waved petals of deep campanula violet, tube is flushed pink and the upturned sepals are Neyron rose. The outer petals are splashed rose while the center remains deep violet blue. Can be pinched to make a basket.

BRIDESMAID. (Patented). Double corolla of pale lilac orchid deepening toward edges. White tube and sepals with light carmine blush. Strong upright bushy grower.

BRIGADOON (Erickson, 1957) — Large long bud opening into very large double flower of violet blue overlaid and marbled with fuchsia pink. Tube and broad sepals pink with light green tips. Tall willowy grower.

CALYPSO (Trade Mark Reg.) A double corolla containing chartreuse, cream, cyclamen purple and amethyst violet. Rosy cream buds open to long recurved sepals of unfading Rose. Medium upright growth.

CAMILLE. A flower with a beautifully spreading corolla of Rose Bengal. Sepals are cupped and short, fully reflexed, colored crimson. The upright, bushy plant has wiry branches and foliage of medium size.

CONSTELLATION (Schnabel, 1957) — Medium large double ivory white with clear white pointed sepals. Medium size bush.

CITY OF RICHMOND. Medium size spreading corolla of pale pink with white upturned sepals. Medium grower and will flower early in season.

CRINOLINE. A double flower, somewhat resembling Seventeen, but large and paler, broad sepals are rosy white. Corolla clear pale rose; strong upright growth. A beautiful fuchsia, and takes our heat very well.

DARK SECRET (Hodges, 1957) — Double corolla of deep violet, a few outer petals marked phlox pink, short greenish tube and heavy broad upturned sepals waxy white outside, palest pink inside. Bushy habit

DESERT SUNSET. (Waltz) — The short white tube is flushed pink while the sepals are a rosy shade rather broad and curl upward. The corolla of smoky rose with splashes of coral and coppery tones turn a brilliant crimson as flower matures. Vigorous spreading growth, free bloomer. Good semi-trailer.

DON PERALTA. Very large flower, usually semi-double corolla, with a long tube and long spreading sepals. Coloring much like the variety Anna.

EASTER BONNET. (Waltz) Double pink upright bushy medium size plant, also grown as trailer. Short tube of flushed rose and broad frosty upturned sepals shading from deep pink at base of petals to pale pink tipped with green. Corolla is a lovely dusky rose pink with slightly deeper shade at base of petals. Flower of excellent substance, last several days.

DOUBLE FUCHSIAS

(Continued)

FANTASY (Waltz) Semi-double, wide open flat flower. Corolla consists of 4 large double purple petals, palest orchid pink at wide open center, and shading to deep dodge purple at edges. The many stamens are extra long and flare out in a novel fashion from the open center.

FASCINATION. Large double pink, deep pink sepals. One of the finest, especially large in cooler climate.

FLUORESCENT. (Trade mark reg.) A very beautiful fuchsia. Tube and long broad sepals white faintly marked pink, semi-double corolla deep lilac orchid, willowy grower. One of our show baskets this year.

FYLING CLOUD. (Patented) Semi-double to double white. Tube and long spreading sepals white; petals with palest rose tint. Flowers are well placed on strong arching branches. An easy upright grower. Makes a fine pot plant.

FRENCH. (Waltz) Tube flushed white, the wide upturned recurved sepals are salmon pink, corolla silvery blue and pale rose mauve, with splashes of pink. The lovely bud when opened is rose shaped and the matured flower flaring open into a rather irregular picturesque form is almost as lovely as the bud. A gorgeous plant in bloom.

GYPSY PRINCE. This excellent variety has very large flowers. Corolla is deep violet purple. Tube and broad upturned sepals are bright red. Be sure to try this new member of the gypsy tribe.

GYPSY QUEEN. A very fine enormous flower with deep crimson calyx and rose-mauve corolla.

HOLLYDALE. The corolla is clear pale magenta, close to the color of fuchsia Mrs. Desmond. Growth habit and free blooming quality of Churchill.

INNOCENCE. Double flowers are medium sized semi-double with spreading, glistening white petals, and upturned sepals of pale rose deepening to crimson at their base. Short tube is crimson.

JAMBOREE. A huge flowered double of brightest carmine. Irregular petals of this immense crisp flower are a dazzling color; tube and sepals are of same colors in a slightly less intense shade. Flowers open carmine. They do not fade; plant is upright.

KING'S RANSOM. A vigorous upright bush with many strong branches strung with globular, medium sized double flowers. Broad recurved granular sepals are clear white, while the many petaled corolla is imperial purple.

LACE PETTICOATS. (Pat.) Double corolla of serrated petals of white shot with palest blush. Large full flower, outspread white sepals. Is most white in the shade. Vigorous upright grower.

LADY ANN. Double spreading corolla formed of many curled petals, opening purplish-blue, with most outside petals marbled phlox pink. Short tube and broad, spreading sepals are white. Strong, bushy, upright grower with fine foliage.

LUNADO (Tiret, 1957) — Upright but will basket with early pinching. Tube and sepals are Rose pink. Double, very large corolla opens Petunia purple, fading into Spirea red. Numerous extra petals are Rose pink. The earliest bloomer in our trial planting.

MARIN JEWEL. A vigorous growing bush making a good pot. The corolla is double, mallow purple, with apricot to pink shadings at the base of the petals. The graceful upturned sepals are flesh pink, slightly darker and iridescent on the under side.

MOONLIGHT. (Waltz) — Short tube and long frosted sepals are greenish white tipped with green, the corolla flesh pink has petals of light rose. As flower matures the colors deepen, and it flares open slightly. This plant is self branching and very free flowering. Medium sized clean foliage. Hardy, heat resistant.

DOUBLE FUCHSIAS

(Continued)

OLD SMOKY. A double, vigorously producing large flower of novel coloring. Tube and sepals flesh pink, underside of sepals pink, corolla old rose with a smoky cast. Upright grower useful as trailer also.

PAPA BLUESS Pat Pend. (Tiret) Double corolla of deep Bishop Violet slightly marbled at base with delicate crimson. Inner part of recurved sepals are carmine rose and outer part pale rose and ivory.

PINK FAIRY. (Waltz) Large double clear pink corolla and creamy white tube with broad recurving sepals of palest rose. Petals of beautiful clear pink, slightly deeper near base when fully matured often opens wide, giving a star-like effect to flower. A good self-branching upright with beautiful clean, dark green foliage which needs no pinching back to make a show pot.

POLAR SEA. Strong upright. Double beautifully shaped corolla of darkest imperial purple marbled white at base. Tube and sepals white.

PRES. FELIX FAURE. A double of the darkest purple splashed with crimson. Will take heat; vigorous.

REVERIE. Medium sized double in the popular pink shade. Recurved sepals are soft pink, corolla pale tyrian rose; petals are waved and spreading. An upright grower; quite heat tolerant.

ROSE CHIFFON. Semi-double trailer with apricot overtones. Exceedingly free bloomer, and the globular, medium sized flowers are a blend of rose bengal in the corolla with rose madder sepals. Will make a very large showy plant in a 12" pot. In the ground, will grow to 6-7 ft.

ROSECREST. (Waltz, 1957) — A large double Fuchsia, with striking and unique contrast between the color of buds and the open flowers. The medium sized tube and broad upturned sepals are white slightly tinged with palest pink underside. The open buds and corolla are a deep lilac mauve turning bright carmine rose as flower matures.

The form and size of flower is similar to Silverado while the color of matured flower resembles the Indian.

Foliage medium size and glossy. Flowers are borne in great profusion on compact bushy plant.

RUBEO. Vigorous bush with large tu-gose foliage. Corolla ranging from deep rose bengal on center petals to crimson on outer ones; pale carmine tube, sepal carmine.

SANTA LUCIA. Double orchid pink, prominent rose veining in all petals, outside petals overlaid salmon-rose. Outside petals are attached to the broad, spreading deep rose sepals, giving the open flower a round "powder puff" appearance. Strong upright grower, large flowers.

SAN LEANDRO. Double magenta to vermillion, tube and sepals carmine; upright grower; big flowers, heat tolerant.

SAPPHIRE. (Waltz) Double corolla of deep purplish blue and wide frosty sepals of clear pink inside, flushed pink outside, short creamy white tube. Ideal potted.

SHARON. Semi-trailing, flowers well formed and double, palest scarlet sepal. Petals rose bengal splashed with extensions of geranium lake at base.

SHY LADY. (Waltz) (Trade Mark Reg.) An exceedingly lovely double rose like flowers, exquisitely formed. Short tube, broad pointed upturned sepals of ivory white; corolla creamy ivory opens into a symmetrical formal flower. At maturity its many petals turns a delicate light peach, upright grower, self branching, free bloomer. Foliage dark green medium size, ideal potted plant; very showy.

DOUBLE FUCHSIAS

(Continued)

SILVER BLUE. (Hodges, 1957) — Double corolla a lovely soft silvery blue, paler toward center and near-white at very base of petals. Outer petals are attached to the broad white horizontal sepals, forming a big, round corolla when fully open. Medium-large deep green foliage on well branched, upright bush of medium height.

SUNKISSED. (Tiret, 1957) — Semi-trailer. Tube and sepals are Azalea pink; tips of sepals are Chartreuse green. Double, medium sized corolla is Jasper red spreading to Crimson. Continuous bloomer.

SWEET LEILANI. (Tiret, 1957) (Pat. Pend.) Upright. Tube and well recurving sepals are pale Rose pink. Huge corolla opens smokey blue. A vigorous grower that can take the heat. Might basket with early pinching. Very popular with all who have seen it here and at Fuchsia shows.

TELEVISION. Large double tube and sepals white outside, light pink underneath; corolla deep orchid splashed with fuchsia pink. Will trail.

THE ARISTOCRAT. (Waltz) White longish tube has beautiful wide upturned sepals pale rose with white tips; serrated creamy white petals of corolla are slightly veined rose at base of tube; strong upright grower similar to Gypsy Queen. Heat resistant.

TITANIC. Double corolla ranges from carmine at base of petals, to deep petunia purple toward edges which have a light "bead" margin. Short carmine tube, thick recurved carmine sepals; will trail.

TREASURE. Fine upright growth, abundance of flowers. Light orchid double corolla of large size; calyx neyron rose.

VIENNA. One of the best of the Gus Niederholzer blues. Tube and sepals bengal rose. Petals lilac blue, splashed with both light and bengal rose. Extra long pistil and well formed stamens complete this flower. Free bloomer.

VIOLET GEM. A large semi-double flower of exceptional beauty, with short stem and upcurved sepals of carmine. The widespread petals of deep violet have just a touch of carmine at the base. Prefers shade. Does not fade.

VOODOO. (Patented) Double corolla darkest of any large double fuchsia a deep purple violet. Short tube and long sepals dark red. Very good.

WHITEMOST. Fluffy perfectly white corolla and faintly pink sepals; floriferous. A sensational beauty Will trail.

WHITE WONDER. A double flower of snow white; wide sepals are crimson. Vigorous.

WINSTON CHURCHILL. A double corolla magenta pink, shaded blue, upturned sepals rose pink; strong medium high grower. Good sized flower and a continuous bloomer.

YONDER BLUE. Double corolla of deep blue and broad upturned sepals of rose red. Large flowers on a vigorous upright growing type.

DOUBLE FUCHSIAS TRAILING

AFTERGLOW. Plant of medium vigor with arching branches and quantities of double flowers in the light flame colorings. Medium sized flowers open from cream colored buds unfolding into frilly, double powder-puff flowers.

ANNA. Double corolla with outer half of petals strong magenta while the base of petals and the sepals and tube are strongest carmine.

DOUBLE FUCHSIAS TRAILING

(Continued)

ANGEL FLIGHT. (Martin, 1957) — Long white tube and wide deep pink sepals, double white corolla with long petals in center, shorter on outside good as trailer.

AUNT JULIANA. Sport of Uncle Jules, identical in form of growth. A large double, pale lavender blue corolla, with red upturned sepals.

BALI HI. (Pat Pend.) A beautiful full double corolla of blue violet fading to rose violet, slightly variegated in later shades. Sepals are pagoda like and colored ivory rose. Very heavy and continuous bloomer. Medium to large leaves of a slight olive cast. Makes fine basket.

BLOOMER GIRL. The short tube and long sepals which turn straight up are bright carmine. There are two tiers of pleated petals; the longer ones are pale pink veined carmine, and tipped at the base of the flower with carmine; the upper tier, with the same shadings, are pleated in tight at the base of the flower giving a puffed out appearance.

BLUETTE. Tiny lavender blue and rose red. Corolla double, lavender blue; sepals rose red. Dainty little plant covered with lovely tiny flowers. Pretty trailer.

CARNIVAL. (Pat Pend.) — Double of brilliant Spirea Red and glistening, frosty white sepals tinted on outer sides with delicate pea green. Long white tube, a heavy bloomer.

ENCHANTED. (Patented) Large campanula blue and rose red double flower. Corolla blue purple overlaid with fuchsia pink. Sepals rose-red. Natural trailer.

EMBERGLOW. Trailer. Tube is Carmine. Well recurving sepals are Carmine rose tipped Pea green. Medium sized double buds open Lilac purple. As the corolla develops it changes into a smokey hue of China rose and Spirea red. Foliage is deep green and lush. Takes pinching very well and makes an excellent basket.

FORT BRAGG (Weichert, 1957)—A sport of the fuchsia Enchanted, identical both in form of flower and habit growth.

The tube and broad upturned sepals are a rose shade, the large double corolla of pale lavender rose has a blueish tinge, the petals are slightly veined with rose.

FIREBALL. (Waltz, 1957) — A large double naturally trailing variety that is unusual for its many color changes as flower matures.

The short tube and broad upturned sepals are bright carmine-tipped green. The buds and corolla are a ruddy purple with splashes of carmine at base of petals as flower matures. Some petals turn a dark blueish purple, which again change into a red of great brilliancy.

FOREVER YOURS. Large, semi-double corolla of Campanula Violet, heavily marbled at base with light pink and rose madder, long, graceful recurved sepals of pale rose shading to delicate pale green at tips. Semi trailer.

GIANT FALLS. (Erickson, 1957) — Double globular corolla creamy white, slight pink veining at base of petals. Broad upcurved pink sepals are tipped palest green. Medium sized, deep green leaves, willowy grower good as espalier, but best as a trailer, making long hanging branches. Large buds, large flowers even in warm San Jose. Continuous and heavy bloomer.

GUS NIEDERHOLZER. A large, double flower of veronica blue. Sepals are carmine. The flower opens bell fashion, fading to a brilliant orchid shade. Best as trailer or standard. Free blooming and self-branching.

LILIBET. A double soft rose corolla flushed geranium lake, long tube and recurved white sepals flushed pale carmine. Beautiful long pointed, green tipped buds. Fine natural trailer.

MAYFLOWER. Spreading corolla light pink, sepals deep pink to rose, conspicuously tipped green. Trailing grower with good sized flowers, best displayed in a hanging basket. Somewhat larger and softer pink than the well known South Gate.

MOLESWORTH. Medium size, of perfect shape, scarlet tube and sepals. Full double snowy white corolla. The branches are pendant.

DOUBLE FUCHSIAS TRAILING

(Continued)

NONPARIEL. A very fine grower and most floriferous, ivory pink calyx and pale purple-blue coloring.

POTENTATE. An all-purpose arching grower, suitable as a climber or for a hanger. Huge flowers of Rubeo type, the long stemmed buds are rose madder tapering to pale rose at the tips. Long tubes and recurved sepals rose madder.

PURPLE NIGHT. (Waltz) Natural trailer with medium to large double flowers. Has short white tube and buds slightly tipped with pink at base of tube. Uprturned sepals are frosty white flushed pink. Corolla a deep royal purple in heart of the flower, the outer petals are heavily marbled with white and phlox pink. The long willowy foliage often trail 4 to 5 ft. One of the finest trailers.

SAN JOSE. A sport of San Pablo, identical in growth and size of flowers, but somewhat more trailing. The corolla is white, sepals rose pink to rosy red, depending on exposure. San Jose will be a good seller because it is a hanger, has the popular red and white coloring and very large flowers.

SAN PABLO. A sport of San Mateo with even better trailing habits. Flower same form and size. Color rose orchid with rose pink stem and sepals.

SAN MATEO. Very large double victoria violet corolla, fuchsia pink splashes. Leathery pink calyx. Fine hanger.

SIDE SHOW. (Erickson, 1957) — Double fluffy corolla white with palest pink undertone veined rose pink, tube and broad upturned sepals deepest red. Trailer.

SIERRA BLUE. (Waltz, 1957) — A fine large silvery blue double variety particularly noteworthy for its beautiful coloring and form.

The short tube and wide upturned sepals are white outer side flushed palest pink underside. The corolla a full double of silver blue gradually becoming soft lilac as the blossom ages.

Grown as an upright, the graceful arching branches display the blooms beautifully. Best as trailer.

SILVER SLIPPER. (Hodges, 1957) — Double corolla white, slightly veined light pink near base. Medium tube and long, narrow upcurved sepals (spread up to 5" in Pacific Grove) soft pink, deeper at base of sepals. Beautiful long buds add considerably to the display. Medium sized deep green leaves on well branched plant, very free blooming and best displayed as a hanger.

SILVERADO. (Waltz) A large double semi-trailer or bush variety. The big round white buds and lovely open blooms are a perfect pastel. The tube and broad recurved sepals are creamy white flushed with pink. The corolla is beautifully formed full double to center, and has petals of pale silvery pink with a lavender undertone.

The aging flower takes on a deeper tone adding to its charm. The medium sized light green foliage make a fine background for these beautiful blooms.

SO BIG. (Waltz) A double flowered pink and white natural trailer, with rather long rosy pink tube. The long stemmed pointed buds are huge and open slowly into exotic like blooms. Corolla is creamy white with long upturned sepals of pale pink which often measures five inches from tip to tip.

Foliage a bright green and in a basket or standard well cared for and pinched back early, will have lush almost tropical growth. Likes shade or filtered light.

SOUTH GATE. Double pink of very nice form. Corolla neyron rose; tube and sepals white tipped green, very good.

STELLA MARINA. Seven to eight ft., but can basket. Semi-double long corolla, companulu violet heavily marked light crimson pink.

STREAMLINER. (Patented). Long, thin tube and long twisted sepals of bright crimson. Corolla semi-double and of the same shade. Natural trailer, free bloomer. Flowers are large.

DOUBLE FUCHSIAS TRAILING

(Continued)

SUMMER SNOW. (Waltz. Trade Mark Reg.) Creamy white semi-double medium size, almost yellow cast to bloom when bud first opens. The white tube and the sleek graceful white buds tipped with green hang from long stems. Recurved white sepals. Corolla white with over-lapping petals of good substance for long keeping and heat resistance. Plant bloomed continuously throughout the season with drifts of creamy white flowers along trailing branches. Here is an outstanding trailer that will be the pride of any garden. Easy to grow.

SWINGTIME. Double corolla milky white. Tube an dshort, upturned sepals shiny red, inside of sepals rose red and of crepe texture; good grower of branching habit. Early free bloomer. One of our most popular trailing varieties.

THUNDERBIRD. (Pat Pend. Tired, 1957) — This will be the outstanding trailing variety for this and many years to come. It is a true and self-branching trailer. The tube and sepals which are extremely long are Neyron Rose. The double corolla is Vermillion spreading to China Rose. An early and profuse bloomer.

TRAIL BLAZER. Best described as a double red spider, with sepals a little paler color. Real trailer, branches hanging directly down sides of basket.

TUMBLING WATERS. A double flowered purple trailing variety. Double flowers are large, well reflexed sepals of dark crimson on outside, light crimson inside. Type trailer in the big purples.

UNCLE JULES. Double violet blue, sepals crimson. Foliage is small, thick, and the growth scandent. Giant double of fine "blue" coloring.

VAGABOND. Large double corolla cercise-red flushed geranium lake on outer petals. Long broad recurved sepals deep red. Very strong grower. Large leaves with enormous flowers. Very fine.

WEDDING GOWN. A delightful near white upright or basket. The corolla is very double white with over petals that shade to pink at the base. The dainty recurved sepals are palest blush pink. The foliage is very dark gren.

1 1 1

SINGLE FUCHSIAS

AURORA SUPERBA. Sepals and tube of light orange apricot, corolla of deep orange peach.

CARDINAL. Giant single scarlet red flowers in great profusion. Strong semi-climber.

CARMEL BLUE. Long single corolla beautiful blue; long white tube and narrow, outspread white sepals flushed palest blush on underside. Vigorous upright bush with excellent foliage and lots of flowers.

CHANG. Single bright orange; flesh sepals flushed red. Strong upright grower, free bloomer.

CITATION. Single white corolla. Tube and saucer-like sepals light to rose pink. Bushy upright grower. Noted for abundance of big flowers. Deep green foliage. Considered tops.

ERECTA NOVELTY. Single white and pink, corolla margined with rose. Erect flowers.

IMPUDENCE (Schnabel, 1957) — Medium-sized flower of the popular wide-open form. The corolla is composed of four round white petals beautifully veined in rose which open perfectly flat. Sepals are long, slim and light red. The plant is bushy and upright to 3 feet.

SINGLE FUCHSIAS

(Continued)

LITTLE BEAUTY. Dwarf compact bush. Very free flowering with lavender blue corolla changing to rosy lavender; deep pink sepals.

LORD BYRON. Small black purple and red. Corolla deep velvety purple; sepals bright scarlet. Dwarf bushy habit.

MABELLE EDWARDS. (Waltz, 1957) — A single clear pink bell shaped flower with long drooping stems. This Fuchsia has daintiness and charm.

Buds are long white and pointed. Sepals of frosty white curl upward, corolla of pale pink has four overlapping petals with a few folded petals inside. The outer petals are scalloped which flare slightly as flower ages.

Upright growth, medium height, flower clusters are well displayed. Needs no pinching to make a good pot plant.

MARIN GLOW. Bush vigorous self-branching to 4 ft. Corolla, single purple fading almost phosphorescent. Very good in pot or tub. Heat resistant.

MISSION BELL. Single bell-shaped flaring flower. Stem and sepals bright crimson, corolla royal blue, fading to magenta. Strong, upright grower.

MRS. RUNDLE. Very long tube and pointed sepals of flesh color with vivid orange corolla. Will trail.

ORANGE GLOW. (Munker, 1957) — Single flaring corolla brilliant deep orange; reddish tube and sepals, inside of upturned sepals same color as the corolla, giving the effect of an all-orange flower. Tall, upright grower with medium sized flowers in great profusion.

OTHERFELLOW. Single, deepening from near-white at base to coral pink at petal edges; tube and short green-tipped sepals are waxy white. Strong upright grower. Very free bloomer.

PINK CLOUD. (Waltz) Large single pink upright; short white tube; long wide upturned pink sepals curl slightly at tips, buds are long and pointed. The corolla has four overlapping petals of clear pink, flaring at maturity. Dark green firm foliage; growing habit of Sleigh Bell which is one of its parents can be used as bush, pillar or espalier. A free bloomer and the largest single pink yet. A very striking flower.

ROSE OF DENMARK. Lustrous rose pink, recurved sepals white. Medium sized flowers and free bloomer.

SCARLET BABY. Graceful single red and purple; bright red curved sepals; pistil and stamen long; grows vigorously.

SLEIGH BELLS. All white beautiful single flower. Has long thin pointed upturned sepals tipped green, and a slim white tube. The single corolla forms itself into a perfect bell. Ideal espaliered, can also be grown as a bush.

SUNRAY. Ornate variegated foliage, silvery white and green. Rosy purple corolla and salmon sepals.

SUNSET. — A well shaped bush with fine foliage, pale pink calyx, and wide open single corolla of brightest sunset color.

TICKLED PINK. (Reedstrom, 1957) — **TRIPHYLLA TYPE.** Long tube is dark pink as is the outside of sharp pointed sepals but white underneath, corolla is bright pink, the plant is a bushy compact grower.

1 1 1

SINGLE FUCHSIAS TRAILING

AMERICA. Long thin tube and sepals rose madder on the outside, solid crimson on the inside. Single short corolla deep crimson.

AUTUMNALE. Highly colored foliage of bronze, orange, yellow and green. Grow in sunnier location. Pinch back frequently.

SINGLE FUCHSIAS TRAILING

(Continued)

BLUEBIRD. (Waltz, 1957) — A new color in the naturally trailing variety very much admired by visitors to our garden. Also the nurserymen who usually prefer all doubles.

The short tube and long pointed slender sepals are snow white. The semi-double corolla of deepest violet blue has scalloped edges which overlap, attached to base of sepals are some extra petals as flower matures, these petals turn a rosy hue as does the corolla. The corolla petals stay folded, giving a trim appearance to bloom.

CARA MIA. (Schnabel, 1957) — Cara Mia has cascade growth. The semi-double globular corolla is deepest crimson while the long garceful sepals are palest rose-pink, slim, pointed and reflexed. Blooms along entire length of branch.

CASCADE. Masses of large single blooms, long pointed sepals white flushed carmine and deep carmine corolla, spread of sepals usually about 6 inches.

GOLDEN MARINKA. A sport of Marinka with the same easy, self-branching habit of growth, deep red flowers and red stems. However, each leaf is variegated with gold, especially near leaf edges, turning to cream as the leaves mature. Veining in leaf is red and leaves are flushed red on underside.

JACK SHANAN. The long tube and pagoda-shaped sepals are of the palest rose bengal and the petals of the same color are margined with a darker shade.

MANTILLA. Trailer with soft willowy branching growth. Bronzy foliage. The flowers are deep carmine. Tubes 3 inches in length. The petals are spreading with pagoda-like sepals. Free bloomer.

MARINKA Almost a self color with rosy scarlet corolla and crimson scarlet sepals.

MAUVETTE. A single natural trailer. Tube and sepals flushed pink. Corolla overlapping petal pale pink with no other shadings. Medium sized bloom with small leaved foliage of good substance. Very pretty.

MISS CALIFORNIA. Single to semi-double. Corolla faintest pink. The sepals medium pink, shaded with deeper pink. Does best in cooler weather.

PINK ELEGANCE. A Waltz Garden patent, No. 143,684. Tube long sepals upturned, salmon pink on the inside, flushed pink on the outside. The bell-shaped corolla has overlapping, often pleated petals of bright phlox pink wide spreading at petal tips. Prefers morning sun, or filtered light.

PURPLE SAGE. Single saucer shaped deep purple corolla opening perfectly flat with recurved deep red sepals. Medium grower.

RED SPIDER. The spidery flowers have a long tube and exceedingly long narrow horizontal sepals of the deepest crimson; long downward pointed petals of deep rose madder veined and margined deep crimson.

STARRY TRAILS. (Waltz) A natural single trailer, very long graceful buds and wide spreading sepals. The tube, streamlined buds and long thin sepals are rosy pink. Corolla has overlapping petals of bright carmine, tipped with creamy white at base of tube; this flower does not fade but retains its glowing rich shade. A very prolific bloomer.

TINKER BELL. Long single white corolla, veined soft pink. Tube and long, spreading and then upturned sepals range from white to pink, sepal inside soft pink, deepening to carmine at tips. Best displayed as hanger. Profusion of fairly large flowers of fine proportion, soft coloring. Small foliage.

PLANTS ARE SENT BY RAILWAY EXPRESS, CARRIAGE CHARGES COLLECT
UNLESS OTHERWISE SPECIFIED.

FUCHSIAS FOR SPECIAL PURPOSES

If you are planning a fuchsia garden or wish to train fuchsias tree shape, pillar, trellis, etc., we would be pleased to help you select the proper varieties.

Join The American Fuchsia Society! They publish a monthly bulletin which is helpful to fuchsia lovers and shade gardeners. Dues at \$2.00 per calendar year. Address: Mr. C. T. Le Hew, 1633 Moreland Drive, Alameda, California.

A MINIATURE MANUAL FOR FUCHSIA CULTURE

SOIL—Is to be rich in humus, water absorbing by the addition of leaf mold, peat and organic fertilizer well mixed in. Loose subsoil is necessary to provide for drainage. A good mixture is made of one third leaf mold, one third good soil and one third well rotted manure.

WATER—Keep soil damp at all times and frequently give overhead shower and a fine moderately sharp spray on the underside of foliage to discourage aphids, white flies, thrips and spittle bugs.

AIR—Should at all times contain a great deal of humidity by keeping walks and walls or fences wet. Strong wind or sharp draft is to be avoided.

LIGHT—Is essential; hot and direct afternoon sunshine is to most varieties harmful. Give morning sun only, wherever possible; or sunshine filtered through trees or overhead lattice work. Dark walls or fences in a shady place should be painted a light reflecting color.

FERTILIZERS—A mulch of manure is advocated with additional feeding of commercial fertilizers feeding often, always careful to use as directed. In the spring your fertilizer should be high in nitrogen; and phosphates later in the season to bring out the blooms. There are many balanced fertilizers on the market at present.

INSECT PEST CONTROL—Persistent vigilance and frequent use of sprays to keep pests out of your garden is much more effective to drive them out after occupation. Insecticides are plentiful.

CARE OF GROWING PLANTS—Most varieties have brittle branches and require protection by stakes, by lattice work or by fastening to walls or fences. In order to shape plants to fit requirements or wishes, eliminate all unwanted growth at any time. To extend flowering season and to improve the quality of blooms pick all flowers as soon as they have passed the prime of their life. Never let seed pods or berries grow. Hoeing near the plants is bad. A three to five inches deep mulch of some organic litter held down around the plant as far as the roots are suspected to spread and kept moist will keep the soil loose and cool in summer, also provide the best protection against frost in winter.

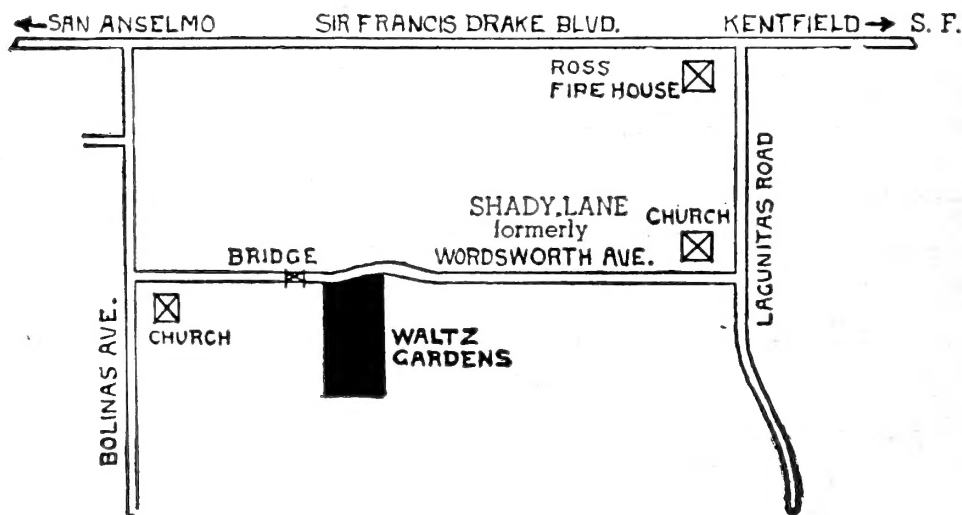

PRUNING—At the season of complete or near dormancy is essential to produce new growth which in turn gives the best flowers. All vigorous branches should be cut back to one or two pairs of dormant buds. The very spindly twigs and those interfering with others are best eliminated entirely by gently breaking them off at their base. All pruning has to be controlled by the consideration of what the plant is desired to be like in the future. Parts of plants damaged by frost should be cut out entirely. Plants frozen down to the ground will produce good new plants from the roots if protected by a mulch.

A LATTICE CONSERVATORY OR LATH HOUSE—Is the greatest boon to the fuchsia specialist. It provides the basis for the nearest imitation of the jungle atmosphere in which fuchsias feel at home. It will offer to you the chances to join the ranks of fuchsia connoisseurs who grow the best varieties to real perfection.

POT CULTURE—As the wave of interest in the new fuchsias spreads to many parts of the country where the climate is less favorable to outdoor growing, pot culture gains in importance. But even in the most favored Pacific regions potted plants are highly treasured for periodical display on porches, verandas, on steps leading to home entrances. Plants in pots need watering daily. Extra rich soil and more feeding in liquid form during the flowering season is needed. This is especially important for hanging pot plants.
